

TECHNICAL RIDER

Green Dave and the NimrodZ, Kingston, Ontario's Green Day tribute power trio. Draft, October 2026. Contact: booking@greendave.ca

LINEUP

- **Green Dave** (Dave Hudson): guitar & lead vocals
- **Steve 'Dirnt'**: bass
- **Andy 'Cool'**: drums

PA & ENGINEER

The band does **not** bring a PA. The venue provides the house PA and FOH system, and a sound engineer if one is available.

LIGHTING

No lighting requirements at this time. House lights / whatever the venue has is fine.

IN-EAR MONITORS (BAND-SUPPLIED)

Based on Dave's current rig, to be confirmed.

- The band runs its own **wired** in-ear monitor system and does not need floor wedges or a monitor mix from FOH.
- Monitor mixer: Dave's **Soundcraft Ui24R** digital mixer, onstage.
- In-ears are wired via a headphone amplifier (model to be confirmed).
- Mic split: ART 1-in/2-out splitter, isolated side to the band's Ui24R, direct side to FOH. The band can take a split of vocal/instrument lines from the house, and the FOH stereo mix can be fed back to Ui24R inputs if useful.
- Backing tracks and click play from an iPad running **StageTraxx**, wired into the monitor mixer (no Bluetooth). Click stays in-ears only.

BACKLINE

Guitar runs through a Hotone Ampero II Stage (amp/IR modelling) and can be sent to FOH as a DI/line signal. Band supplies its own instruments.

INPUT LIST (PROVISIONAL, TO BE CONFIRMED)

#	Source	Notes
1	Kick	House standard
2	Snare	House standard
3-4	Overheads L/R	Or drums mic'd to house standard
5	Bass	DI
6	Guitar (Ampero)	DI/line out
7	Lead vocal (Dave)	Split via ART splitter: band Ui24R + FOH
8-9	Backing tracks L/R	Stereo line from the band's Ui24R

The band's Ui24R can send a stereo backing-track feed to FOH. Final channel count, mics and any backing vocals to be confirmed with the venue.

POWER (TO BE CONFIRMED)

A few grounded 120V outlets: stage left, stage right and at the drum riser.

TO BE CONFIRMED

- Headphone amplifier model (the one previously used was rented)
- In-ear earbud models for each member
- iPad (StageTraxx) to Ui24R interface and cabling
- Exact power draw / number of outlets
- Final input list and whether the band needs backing-vocal mics
- Stage plot
